

Instructions for accessing and using the Aurasma app to display the GGC Chemistry/IT Aura

- Download and install the Aurasma app (icon is a purple A) from either the Google Play Store (android phones / tablets) or the Apple Store (iphone, ipad)
- Upon opening Aurasma for the first time, you will be brought to a series of tutorial screens. Swipe left to get through each of these screens (Welcome to Aurasma, Identify, Experience, Follow, Create & Share).
- Swiping left on the 5th tutorial screen (Create & Share) gets you to the Aurasma Login screen. There is no need to create an Aurasma account in order to be able to view our Aura, so hit the 'Skip' button at the bottom of this screen.
- Hitting the 'Skip' button brings you to the Aurasma capture screen, which has the four corners of a frame surrounding a set of 6 dots moving in and out of a central 7th dot. At this point, hit the white Aurasma logo at the bottom of the capture screen.
- This brings you to the Explore screen. Here, select the search tool (the magnifying glass) at the bottom of the screen. This allows you to search for the GGC Aurasma channel to follow. In the search box, type in **GGC-Chem**, then click the check mark (bottom right of the screen).
- Select the entry named **GGC-Chem's Public Auras**, and hit the 'follow' button at the top of the screen.
- At this point, you will need to return to the Explore screen to update the Auras your device will recognize. Select the Aurasma icon (the A at the bottom left of the screen).
- Once you are back at the Explore screen, the Auras can be refreshed by simply swiping down from the top of the screen.
- Now you are all set. Switch back to the Aurasma capture screen, by selecting the frame icon at the bottom of the screen (it is next to the search tool icon).
- Center the trigger picture on the nonmoving central dot of the capture screen. You may need to move your phone closer to and further away from the trigger for it to capture - you will know when the Aura has been triggered!
- Once the Aura has been triggered, feel free to move your device around and see how the Aura moves with it. Try out the buttons for the complete Aura experience!
